

3D Anatomy & Physiology

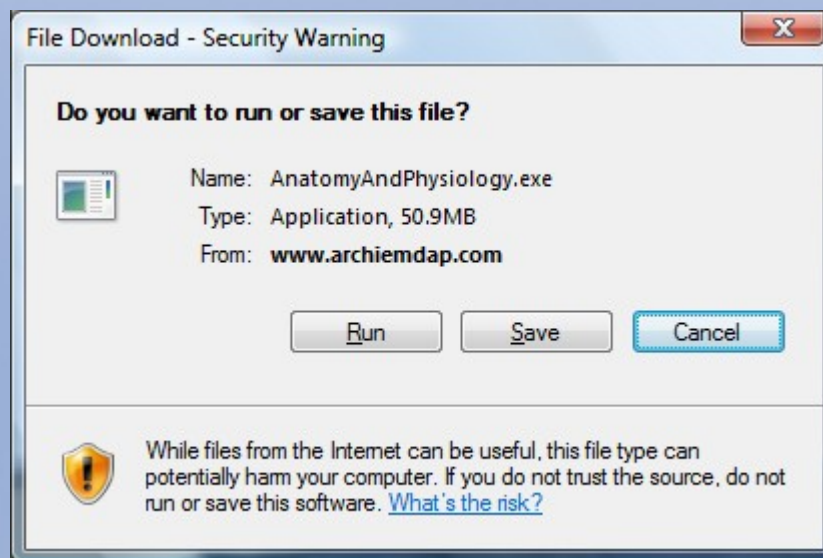

Installation Steps – Windows Vista, Internet Explorer

Step 1 – Close out of any other running programs or browser windows.

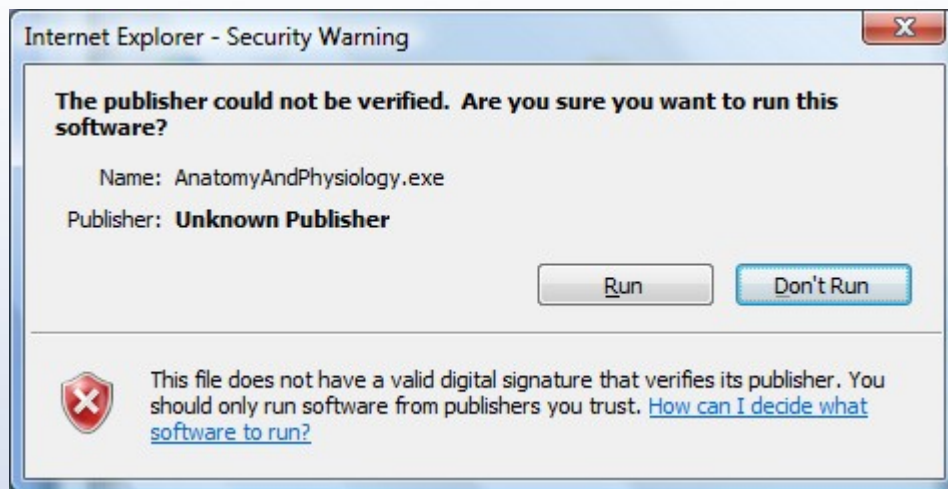

Step 2 – Click on the Installation Download link:

Step 3 – Click on run so that the file will automatically run when the download is complete:

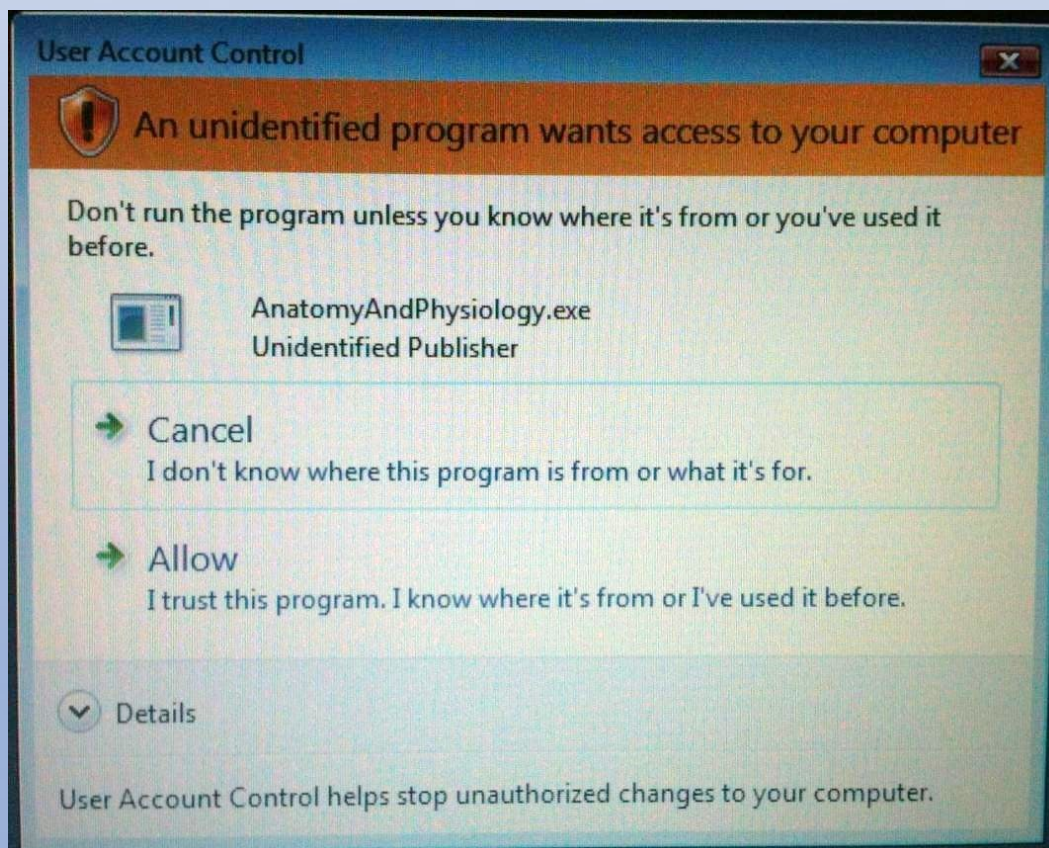

The following warning may appear when the file is finished downloading:

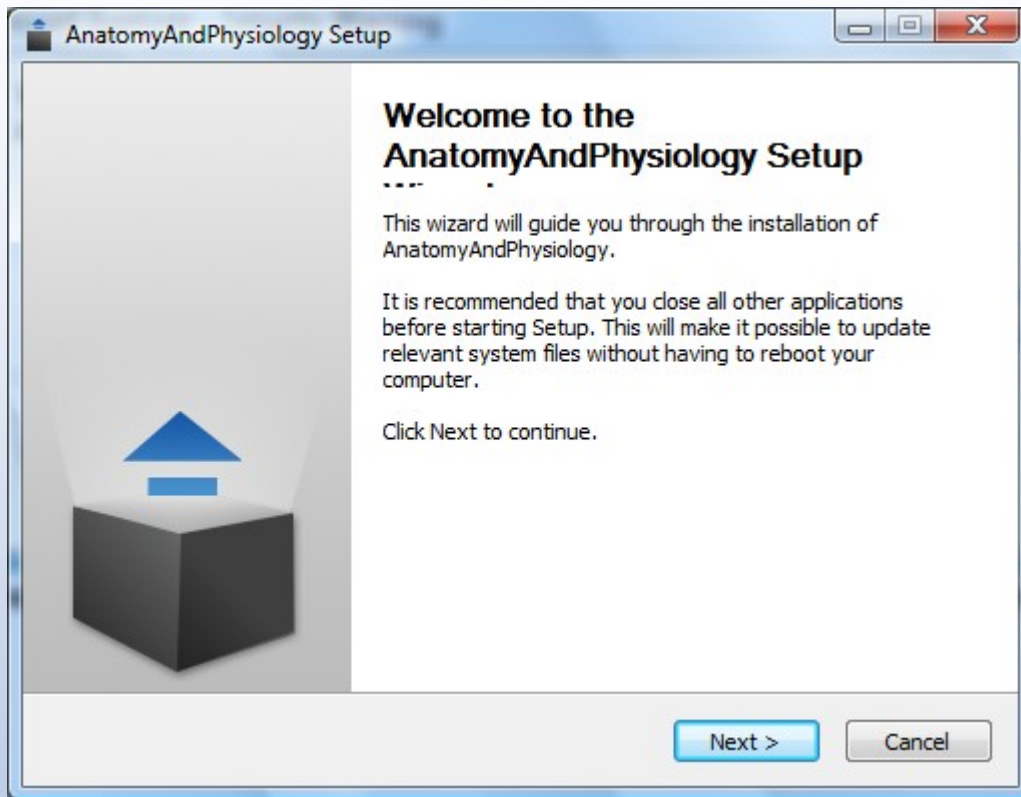

Click "Run".

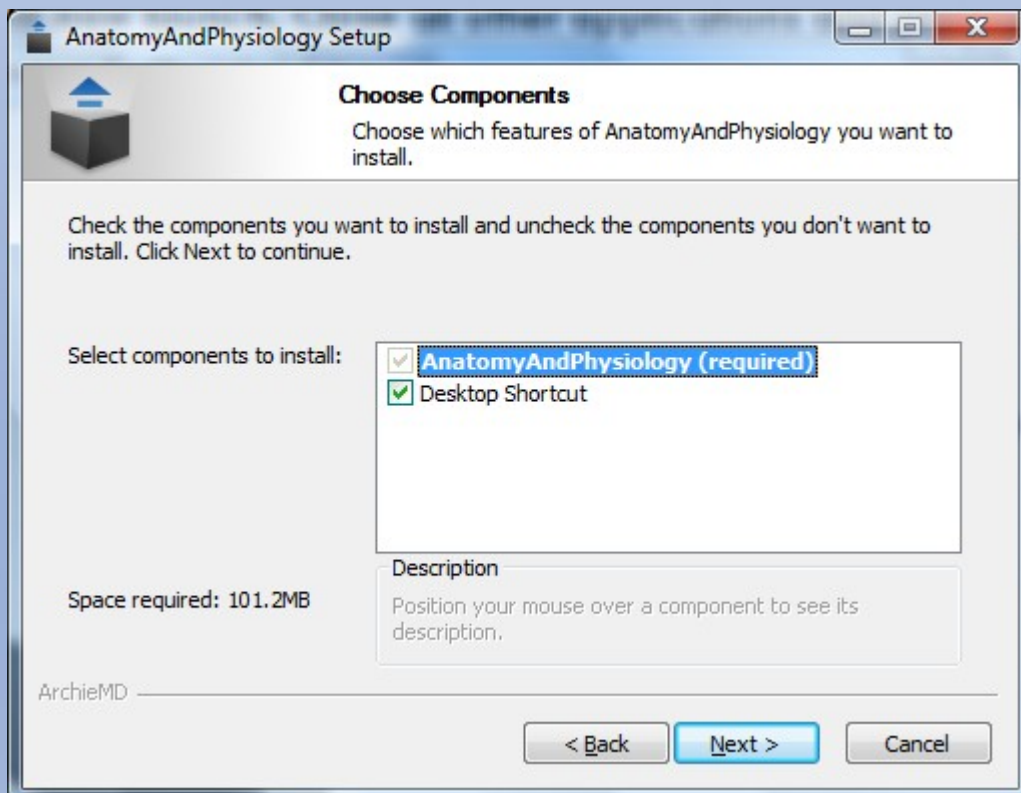

Once the file finishes downloading, a warning from the User Account Controls may appear. Click "Allow" to proceed with the installation.

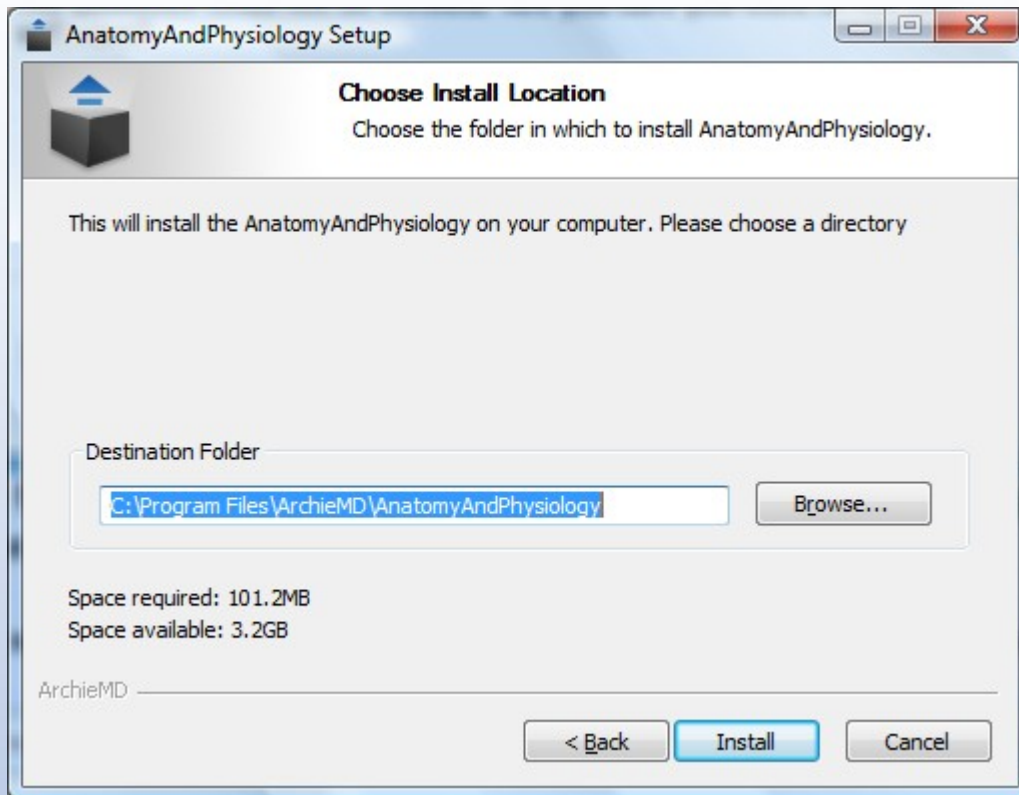

Step 4 – The setup wizard will now launch. Close all other applications and programs before clicking next.

Step 5 – At the next screen, you can decide if you would like the installation wizard to install a desktop shortcut along with Anatomy and Physiology. This will make the program easier to find once installation is complete. Click “Next” when you are ready to continue.

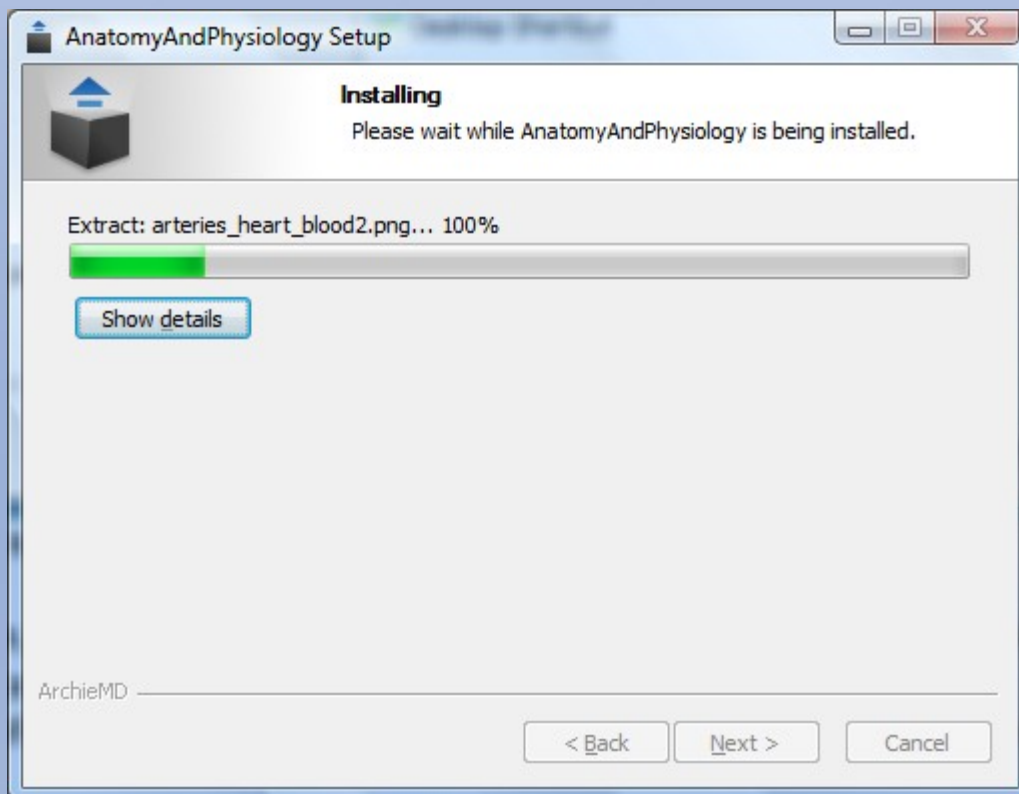

Step 6 – On the next screen, you will choose where Anatomy and Physiology will install. Choose a location that you will remember and will be able to locate later.

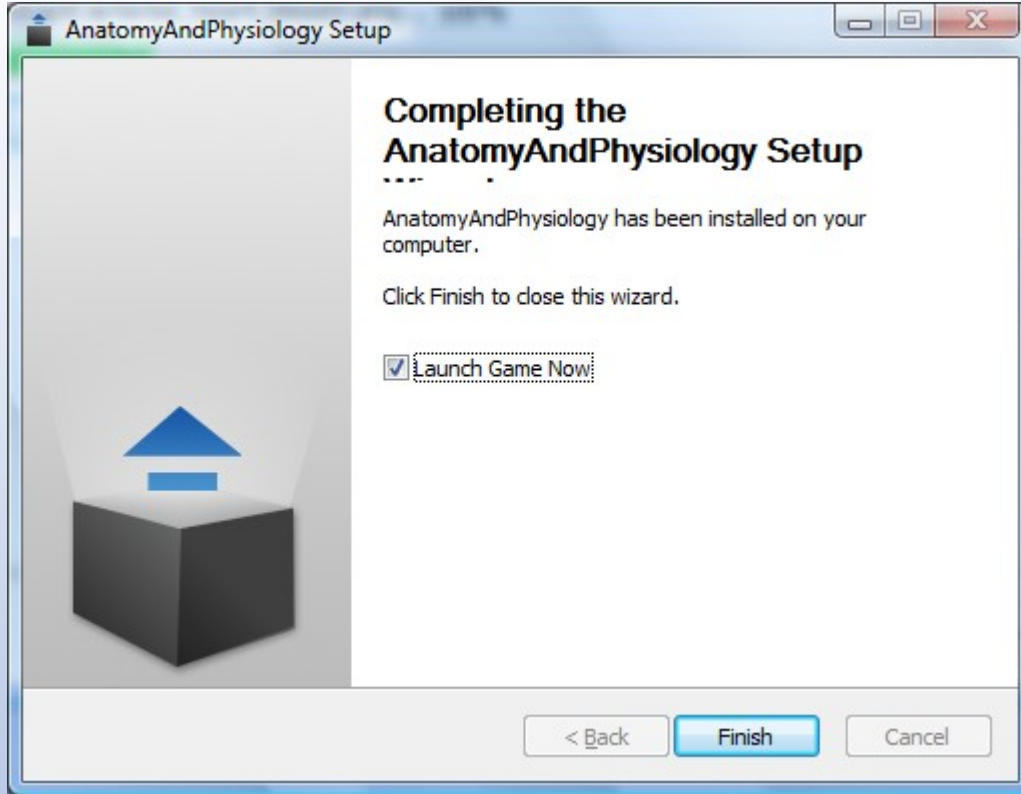

If you would like to change the location Anatomy and Physiology installs at, simply click “Browse...” A new window will appear, allowing you to choose the appropriate location.

Step 7 – Anatomy and Physiology will now install. Please wait for it to finish.

Once the wizard is finished installing Anatomy and Physiology, you can click “Finish” to close the installer. If you would like to immediately use Anatomy and Physiology, ensure that the check-box next to “Launch Game Now” is enabled.

That's all! Enjoy Anatomy and Physiology!
